| **Marks** | 1.00/1.00 |
| **Grade** | **10.00** out of 10.00 (**100**%) |

**Question 1** | Correct Mark 1.00 out of 1.00

**Problem Statement**

Given an array of 1s and 0s this has all 1s first followed by all 0s. Aim is to find the number of 0s. Write a program using Divide and Conquer to Count the number of zeroes in the given array.

Input Format

First Line Contains Integer m – Size of array

Next m lines Contains m numbers – Elements of an array

Output Format

First Line Contains Integer – Number of zeroes present in the given array.

**Answer:** (penalty regime: 0 %)

```c
#include <stdio.h>

int countZeroes(int arr[], int low, int high, int size) {
    if (high >= low) {
        int mid = low + (high - low) / 2;

        if ((mid == 0 || arr[mid - 1] == 1) && arr[mid] == 0) {
            return size - mid;
        }

        if (arr[mid] == 1) {
            return countZeroes(arr, mid + 1, high, size);
        }

        return countZeroes(arr, low, mid - 1, size);
    }
    return 0;
}

int main() {
    int m;
    if (scanf("%d", &m) != 1) return 0;

    int arr[m];
    for (int i = 0; i < m; i++) {
        if (scanf("%d", &arr[i]) != 1) return 0;
    }

    int result = countZeroes(arr, 0, m - 1, m);
    printf("%d\n", result);

    return 0;
}

```
